-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3744

1. Claims 5, 9, 11, and 16-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on September 14, 2004. It is noted that although Applicant made his election with traverse, he did not present any reasons for the traversal. Therefor, the election is being treated as without traverse.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4, 8, 10, 12, 13, 15, 21, and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Knapp '016. Knapp '016 discloses the claimed invention, including hot and cold inlets 7 and 8, with each inlet communicating with a multi-stage plenum chamber 10 having a partition 18 separating the stages.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 6 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Knapp. Knapp discloses the claimed invention except for the shape of the opening 21

Art Unit: 3744

and the dimensions of the mixing chamber. Both of these parameters are considered to be matters of obvious design choice to one of ordinary skill in the valve art, because no criticality or unexpected results are seen or have been disclosed for the recitation of the opening 21 being in a series of slots, or the cross-sectional area of the mixing chamber being from 1 to 1.5 times the combined cross-sectional area of the hot and cold flows.

6. Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Knapp in view of Lorch '175. Knapp discloses the claimed invention except for the cartridge. Lorch '175 teaches a mixing valve in the form of a cartridge. It would be obvious to make the mixing valve in the form of a cartridge, in view of Lorch '175, for the purpose of making it easy to replace the thermostatic element.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
